**Introducing  
The Toughest  
24 to 12 Volt  
Converter Ever  
To Hit The Road.**

The Wilmore Series 1416 powers mobile radio units in the roughest of conditions. Built to meet military shock and vibration specifications, this DC/DC converter stands up to the shocks of life on an earth mover. And it goes the long haul in city buses and heavy-duty vehicles of all kinds.

This rugged converter is engineered to protect itself and your radio

from common system faults and installation errors. Choose from 15, 25 or 35-ampere models, each with convenient remote enable. Available from stock for immediate shipment.

Call today to learn how Wilmore can solve your toughest mobile radio power needs.

## Band-It® E.V.A. Cable Ties

**For cable bundling on communications towers and antennas**

Eliminate expensive maintenance costs associated with replacement of plastic cable ties. Begin using Band-It® E.V.A. Cable Ties, specifically designed for outdoor use on towers and antennas.

Plastic ties become brittle, crack, and often fail off due to U.V. breakdown, cold temperatures, and other outdoor weathering problems. Band-It® E.V.A. Cable Ties provide **permanent** protection from all outdoor conditions because they are made from high strength, corrosion resistant 316 stainless steel coated with Ethylene-Vinyl Alcohol \* copolymer.

E.V.A. is U.V. resistant, flexible in extreme cold, corrosion resistant, flame retardant, non-toxic, halogen free, and protects cables from potential damage or interference due to direct contact with the stainless steel.

Band-It® E.V.A. Cable Ties are available in 1/4" and 3/8" widths, and lengths from 6" to 36". They are fast and easy to install and are **REUSEABLE**.

Write or call for your free sample and brochure, and the name of the Band-It® distributor nearest you.

\* (Trade name Levasint®, mfg'd by Bayer, W. Germany)
